Rahul Verma

Backend Software Engineer

Pune, India | rahul.verma.dev@email.com | +91 98xxxxxx02 | github.com/rverma-dev

SUMMARY

Backend engineer with 6 years of experience designing and scaling distributed systems for high-traffic consumer applications. Deep expertise in Java/Spring Boot microservices, event-driven architecture, and cloud infrastructure on AWS.

SKILLS

Java, Spring Boot, Python, Kafka, Redis, PostgreSQL, MongoDB, Docker, Kubernetes, AWS (EC2, Lambda, RDS), System Design, REST/gRPC APIs, CI/CD (Jenkins, GitHub Actions)

EXPERIENCE

Lead Backend Engineer — Cartify Commerce *(Jan 2023 – Present)*

- Re-architected the monolithic order-management system into 8 Spring Boot microservices, improving deployment frequency 5x
- Designed a Kafka-based event pipeline handling 2M+ events/day for real-time inventory sync
- Reduced average API latency from 480ms to 140ms through caching (Redis) and query optimisation
- Owned on-call rotation and incident response, improving MTTR by 35%

Software Engineer II — TransitEase Mobility *(Jun 2020 – Dec 2022)*

- Built the ride-matching service (Java, PostgreSQL) supporting 50k daily active riders
- Implemented rate-limiting and circuit-breaker patterns, cutting downstream failures by 60%
- Migrated legacy services to Kubernetes on AWS EKS

Software Engineer — InfyNext Solutions *(Aug 2018 – May 2020)*

- Developed REST APIs for an HR management SaaS product used by 200+ client companies
- Set up automated CI/CD pipelines, reducing release cycle from weekly to daily

EDUCATION

B.E. Computer Engineering, Pune Institute of Computer Technology (2018)
